During inspection, it was observed that the existing road surface was severely deteriorated with potholes, uneven patches, and damaged bituminous portions, making the road difficult and unsafe for vehicular and pedestrian traffic. The estimate therefore includes providing Wet Mix Macadam for 130 m wherever strengthening of the pavement is required, followed by bituminous surfacing (MSS) for a total length of 560 m. The estimate also includes the renovation of the road leading towards Akkarathottam Kadath for a length of 260 m, comprising the provision of Wet Mix Macadam followed by bituminous surfacing, along with interlocking tile paving for a length of 135 m in the identified portion wherewater stagnation occurs , bituminous surfacing is not feasible due to site conditions and to ensure improved durability and accessibility. The proposed works have been designed in accordance with site requirements and prevailing specifications to provide a durable, all-weather road, improve riding quality, ensure safe and convenient movement of traffic, and enhance the overall infrastructure in the locality.
